

Whether you have been a restaurant operator for a week or for years, you strive to successfully operate your restaurant everyday. What you might not realize are the bottom line profits that you could be losing and more importantly, how you are losing them.

With Radiant Systems' newest hosted back office solution, you can operate with the tightest loss prevention tool in the industry - Aloha Restaurant Guard. Providing you with the highest level of transaction intelligence, you will gain visibility into potential theft occurring at your restaurants along with the necessary support data to put a stop to it. Aloha Restaurant Guard helps you take the theft out of your restaurant and allows you to focus on what's critical to your business - operations and customer satisfaction.

INCREASE PROFITS

- Protect your restaurant's bottom line profits by identifying fraudulent activity at the point-of-sale

IMPROVE OPERATIONAL EFFICIENCY

- Eliminate the need for manual analysis of performance metrics by generating alerts that include actionable data and history
- Real-time monitoring to stop losses and minimize the total impact of potentially fraudulent behavior

INCREASE VISIBILITY AND CONTROL

- Improve controls without impacting the guest experience
- Identify all present fraud and history and deter theft from happening in the future

ALOHA RESTAURANT GUARD

STOP THEFT IN ITS TRACKS

Powerful and unmatched in the industry, Aloha Restaurant Guard is specifically designed to increase security at your restaurants point-of-sale by:

- Scanning transaction history and tracking historical trends to identify anyone performing suspicious activities
- Continually updating your system to identify new theft patterns found in all restaurants
- Detering theft which allows you to focus on running your operations and lets Aloha Restaurant Guard take care of the rest

Put cash back on your bottom line and prevent theft scams at all stations in your restaurant with reports that track more than a dozen common scams including:

- Transfers (“Wagon Wheel”)
- Voids After Check Close
- Comps After Check Close
- Comps After Check Print

In depth and customizable reporting analysis with ZERO configuration necessary.

- Summarizes loss prevention and provides comparative alerts of scams
- Understand overall individual site rankings by kitchen, dining room and fraud index
- Easy to read server summary reports capturing best and worst performers
- Displays detailed incident history by employee ID and calculates total potential loss

17:52:16 Check 2032 was printed
17:58:19 Check 2032 was closed to credit card

The Soft Drink was transferred 2 times over a period of 1 hour 34 minutes.

Alert Description

Transfer Scam

The **Transfer or Wagonwheel Scam** typically involves transferring self service items (those that don't generate a kitchen chit), such as a coffee or soda, off of a check that has been paid for with cash and rousing the same item on another check.

Example:

- A guest orders a soda and sandwich and is presented a check with both items.
- The guest pays for the check with cash.
- The server transfers the soda to another check and then closes the check with only the sandwich remaining to cash, pocketing the difference.
- The check with the transferred soda is then used for the server's next table.

Employees engaging in this activity will often transfer the same item multiple times each time the item is successfully transferred from a cash check results in a sales loss for the restaurant and a fraudulent cash gain for the server.

RECENT INCIDENTS
